

Contractor Safety Management (Fast Track)

INTRODUCTION

- This highly-interactive Contractor Safety Management training seminar will provide you with all the necessary skills and talents to successfully appoint a contractor and manage them with confidence to ensure their health and safety performance will be of the highest quality.
- Your organization is never more at risk than when you outsource work without validation. Therefore, you must have all the necessary checks and balances in place to ensure this process is well managed.
- Contractors must be informed, assessed, and monitored in various ways to ensure their performance does not have a costly negative impact on your business. The contractor's actual performance must match their stated intentions; otherwise, the statements and documents provided within any completed tender are meaningless, leaving your organization and its reputation at risk.
- This Contractor Safety Management training seminar will develop your ability to critically assess your contractors at all stages of a project to ensure you receive maximum performance with minimum risk.

OBJECTIVES

- The objectives of this training program is to ensure you gain detailed information and competency for safely managing contractors.

This training course has five key objectives for Contractor Safety Management:

- Planning and selecting contractors – practical arrangements and methods
- Establishing project interface agreements, documentation and HSE Project Plan
- Managing contractors' compliance, with the HSE Project Plan, on a day-to-day basis
- Monitoring – keeping track of contractor's performance
- Reviewing and learning – contractor management, deciding what needs to be improved
