

FIDIC Contracts Management

Practical Use of FIDIC Contracts

Why Attend

- This course is designed to provide practical guidance to those involved in the management or administration of projects where use of FIDIC forms of contracts is required. The course covers management disciplines and procedures in the “Pre-Contract” phase of the project including the FIDIC Client Consultant Service Agreement and selection of the appropriate FIDIC form of contract. It also covers the “Post Contract” award phase, including all contract management disciplines and claim management issues.
- This practical course explains and illustrates the use of the FIDIC conditions of contract for construction (the “Construction Contract”) and the FIDIC conditions of contract for plant and design-build (the “Design-Build Contract”). The course covers the 1999 Contracts books with highlights regarding the 2017 Second Editions.
- The course will enable participants to gain confidence in working with these documents, whether they represent employers, consultants or contractors.

Course Methodology

- This course is highly interactive and includes group discussions, case studies and syndicate work. It also includes practical exercises that enable all participants to apply the advanced knowledge they gained and demonstrate their skills in managing FIDIC Contracts.

Course Objectives

By the end of the course, participants will be able to:

- Apply the correct FIDIC form of contract that is best suited for each project
- Implement FIDIC’s principles, mechanisms, and best practices for contract and project management
- Demonstrate the responsibilities, obligations, and entitlements of the employer and the contractor
- List the engineer’s different roles, duties, and responsibilities in relation to FIDIC contracts
- Apply the correct payments, claims, and dispute resolution mechanisms as envisaged by the FIDIC contracts

Target Audience

- This course provides the necessary knowledge for professionals from government entities, private sector employers, consulting engineers, contractors, quantity surveyors, architects, legal advisers, funding agencies, insurers, and all professionals involved with FIDIC contracts.

Target Competencies

- Understanding FIDIC contracts
- Contract administration
- Claim management
- Dispute resolution
- Construction management

FIDIC contract documents: Introduction and principles

- Introduction to FIDIC
- Background to FIDIC contracts
- Harmonization based on the type of project
- Features of the 1999 editions
- Structure of the documents
- Forms
- Main differences between the 1999 construction contract and the 1987 Red Book
- User friendliness
- Preparation of conditions of contract
- The legal character of FIDIC conditions of contract
- Relationship between FIDIC conditions of contract and legal systems
- Risk analysis
- Which form to use
- Overview of the 1999 contracts
- Construction contract
- Main differences between the construction contracts
