

Sustainable Finance & Investments

INTRODUCTION

- This training course on Sustainable Finance explains how the financial sector can be mobilized to create a better world. By using finance as a means to achieve social goals, we can divert the planet and its economy from its current path to a world that is sustainable for all.
- This training course combines theory, empirical data, and policy to explain the sustainability challenges for corporate investment. It shows how finance can steer funding to certain companies and projects without sacrificing return and thus speed up the transition to a sustainable economy. It analyses the Sustainable Development Goals as a strategy for a better world and provides evidence that environmental, social, and governance factors matter, explaining in detail how to incorporate these factors in the corporate and financial sectors.

PROGRAMME OBJECTIVES

- This training course aims to enable participants to achieve the following objectives:
- Learn what the principles of sustainable finance are.
- Understand what the interplay is between the UN Sustainable Development Goals and finance.
- Understand what the importance of a long-term perspective is.
- Understand the role of finance in the transition to a sustainable economy.

WHO SHOULD ATTEND?

This training course is aimed at and valuable for:

- All finance professionals
- Investors
- Board Directors
- Project managers
- Sustainability architects and engineers

TRAINING METHODOLOGY

- This Sustainable Finance & Investment training course will combine presentations with interactive practical exercises, supported by video materials, activities and case studies. Delegates will be encouraged to participate actively in relating the principles of sustainable finance to the particular needs of their workplace.

PROGRAMME SUMMARY

- Finance is widely seen as an obstacle to a better world. This course on Sustainable Finance explains how the financial sector can be mobilized to counter this.
- Throughout this course, participants will learn about the UN Sustainable Development Goals and how social and environmental factors should not be regarded as externalities. Participants will learn more about sustainable banking and asset management, about effective engagement, sustainable scenario analysis and long-term value creation.
- Upon completing this Sustainable Finance & Investment training course participants will understand how sustainable finance can be used as a tool to steer the sustainability transition.
