

Financial Analysis , Modelling & Forecasting

INTRODUCTION

- This leading edge Financial Analysis, Modelling and Forecasting seminar will provide you with the essential financial modelling skills to analyse and manage risk and business performance in the turbulent conditions of the 21st century. In today's globally competitive world decision-makers face unprecedented levels of risk and uncertainty and traditional financial analysis and forecasting tools do not provide the flexibility and responsiveness to manage in these demanding conditions.
- This practical hands-on training course will provide you with the methods and techniques of financial modelling in Excel that will equip you with a set of powerful financial tools with which to anticipate and manage the opportunities and threats confronting your organisation.

This training seminar will highlight:

- Competitive challenges for 21st century business
- Advanced skills in financial modelling with Excel
- Mastering the tools and techniques of financial analysis
- Improving forecasting quality and minimising error
- Effective capital investment decision-making
- Models and techniques for managing risk and uncertainty

OBJECTIVES

- This training course has been designed to provide you with up to date knowledge and practical skills in the preparation and interpretation of public sector financial statements and budgets.

By the end of this training course you will have learned to:

- Design and build practical and effective financial models in Excel
- Improve your skills in analysing and interpreting financial statements
- Build financial forecasting models for a range of business applications
- Apply financial modelling techniques to investment decision-making
- Use a range of tools to analyse and manage business risk

TRAINING METHODOLOGY

- This training course will be structured as a highly participative workshop with formal presentations, case studies and interactive worked examples. Relevant examples and case studies illustrate the application of each of the topics covered and ample opportunities are provided to practice and perfect financial modelling in Excel with one of our laptops, or your own.

ORGANISATIONAL IMPACT

- Advanced skills in financial analysis and interpretation of financial data
- Highly developed financial modelling capabilities
- Application of critical analysis to capital investment decisions
- Development of high quality forecasting skills
- Flexible approach to risk analysis and management

PERSONAL IMPACT

Delegates will benefit from this hands-on workshop that has been designed to provide them with the essential theory of financial analysis, forecasting and financial decision-making whilst focusing heavily on building the practical skills to develop their own financial models in Excel. This Finance & Budgeting training seminar on Financial Analysis, Modelling & Forecasting will greatly enhance their contribution to organisational performance and improve their career prospects by:

- Raised awareness of management of risk and uncertainty
- Greater involvement in management planning and decision-making processes
- Advanced knowledge of Excel and its most powerful financial functions
- Using powerful Excel financial modelling skills for forecasting and decision-making
- Ability to model and apply investment decision-making techniques

WHO SHOULD ATTEND?

- This Financial Analysis, Modelling & Forecasting training seminar is designed to provide useful insights and practical skills to professionals from a wide range of disciplines and industry sectors, but particularly those involved in planning, forecasting and investment decision-making in an age of risk and uncertainty.

This training seminar is suitable to a wide range of professionals but will greatly benefit:

- Financial Accounting Team Members
- Cost and Management Accounting Staff
- Finance Managers
- Planning Managers
- Commercial Managers
- Capital Investment and Project Team Members

Course Outline

The Competitive Challenge in the 21st Century
