

Business Analysis for Project Success

INTRODUCTION

- Have you noticed that your projects don't seem to deliver what stakeholders expected?
- Business Analysis is recognised in the modern world as a fundamental prerequisite to successful solution of business problems and enhanced return on capital investment. Bigger challenges, bigger investments, higher risks of business projects are combined with overwhelmingly complex economic conditions, high uncertainty and increasingly demanding stakeholders. The key to success in this environment is the need to understand the business need in the first place and to translate it to a clear set of requirements.
- The Business Analysis for Project Success training course covers the knowledge necessary to conduct comprehensive analysis of business needs and definition of project requirements that are clearly linked to the creation of measurable organisational value. This training course is focused on the enhancement of essential knowledge and skills and equips participants with a toolbox of ideas and methodologies for effective elicitation and analysis of business requirements.

Participants for Business Analysis for Project Success training course will develop the following competencies:

- Project definition and scoping
- Critical thinking, strategic analysis and management decision making
- Business needs analysis
- Stakeholder management
- Requirements elicitation techniques
- Option analysis
- Requirements prioritization and documentation
- Scope management planning and control

PROGRAMME OBJECTIVES

- The Business Analysis for Project Success training course aims to expand participants' knowledge of business analysis methodologies to help distinguish the real business value from general wishful thinking. It provides a productive environment to develop hands-on skills and practice specific diagnostic tools and techniques.
- Define the nature of business problems and link it to business directions
- Apply strategic thinking and leadership to business needs analysis
- Recognise and actively manage divergent stakeholder expectations
- Elicit and analyse pertinent business information from a wide range of sources
- Use proven diagnostic and analytical tools to organize, verify, validate and prioritise requirements
- Document and justify clear, concise and effective project requirements

WHO SHOULD ATTEND?

- This training course will benefit professionals and managers who are involved in project initiation and would like to be able to effectively understand business requirements, define their projects and convince stakeholders to support them.
- The Business Analysis for Project Success training course will equally appeal to decision makers and those who support them in the private, public and not-for-profit sectors.

TRAINING METHODOLOGY

- Highly cognisant of different learning styles, this programme combines high level of delegate interaction with conventional lecture style and practical exercises, case studies, group discussions and real life examples. Delegates are encouraged to contribute their own experiences for discussion and debate which facilitates exchange and enhancement of delegates' knowledge and skills from a variety of industries.
- With multiple short case studies, exercises and facilitated discussions of real life experiences, this course aims to share a wealth of practical tools and methodologies developed through years of management and consulting experience.

PROGRAMME SUMMARY

- The Business Analysis for Project Success training course is structured to equip participants with the essential business analysis knowledge and skills. This stimulating learning experience provide participants with opportunities to practice practical problem solving in specific business situations. Participants will take away a comprehensive set of reference materials about essential tools, methodologies and "tricks of the trade" often used by business analysts, including templates and checklists that they will be able to adapt for their business to assist in formulating and communicating business decisions.
