

Leading with Critical Thinking , Creativity and Innovation

INTRODUCTION

- Creativity isn't the sole domain of gifted artists, but in fact a learnable skill that can be applied not just in creating innovative products and services, but to every aspect of work life processes and communications. By applying creativity to the tasks and challenges you face in your work, you will begin to experience breakthroughs you never thought possible. You will feel confident that you really are on the creative edge and able to consider different sides of an issue while anticipating a broader range of possibilities.
- In this Leading with Critical Thinking, Creativity & Innovation training course, you will discover how to build and expand your creative abilities and those of your team.

Participants will develop the following competencies:

- Use effective communication to motivate creativity in your team
- Help your team find creative solutions to workplace challenges
- Come to accurate conclusions and decisions more often
- Recognise and encourage creative people
- Learn how to challenge assumptions and expand perceptions about situations

OBJECTIVES

This training course aims to enable participants to achieve a high level of confidence in their ability to solve problems, think creatively and communicate their ideas confidently. Objectives for the week include:

- Building a company culture that promotes innovation & creativity
- Understanding and utilizing the immense capacities of our brains create new ways of thinking, doing and being
- Mastering creative ways to present your ideas confidently
- Balancing logic and intuition to make more effective decisions
