

Healthcare Procurement and Supply Chain Management

INTRODUCTION

- This Healthcare Procurement & Supply Chain Management training seminar offers a unique opportunity to the delegates. It is well known how critical for Healthcare is the Procurement supply chain to discover its complexities within a dynamic and complex environment as the new global circumstances form it. Supply is uncertain, therefore developing and maintaining a working relationship with the suppliers is of paramount importance.
- As it becomes more challenging, the healthcare environment, entering uncertain periods, requires a new strategic and tactical approach to ensure long-term profitability, inventory optimization, and quality assurance.
- This training seminar will highlight the critical points to consider and reassess the approaches with stakeholders (internal and external) in the global market. It will offer best practices and practical applications for the delegates to re-approach and reassess the supply chain to become more competitive and cost-effective.

This training seminar will highlight:

- The importance of product availability
- How to create an efficient Sales Level Agreement?
- Effective negotiation (win-win)
- Ways to locate and remove waste from the supply chain
- Tools to measure supply chain performance

OBJECTIVES

- Re-evaluate and implement effective procurement strategies
- Negotiate in “win-win” terms with stakeholders
- Assess Risks in the health supply chain
- Manage capacity and efficiency in the storeroom and beyond
